Muhammad Bilal Faisal

Karachi, Pakistan | Web Developer & QA Tester

Professional Summary

Dedicated Web Developer and QA Tester with a strong foundation in modern backend and frontend technologies, including PHP, Laravel, JavaScript, and Tailwind CSS. Proven ability to progress rapidly from a learning role to a core technical contributor in an agency environment. Adept at writing clean, modular, and production-ready code while ensuring application stability through rigorous quality assurance and debugging. Collaborative team player experienced in fast-paced, remote, and agile development settings.

Technical Skills

- **Backend Development:** PHP, Laravel, Node.js, MySQL, Supabase
- **Frontend Development:** JavaScript, Tailwind CSS, HTML5, CSS3, Bootstrap, jQuery
- **Tools & DevOps:** Git, GitHub, VS Code, XAMPP, Postman, Vercel
- **Design & UI/UX:** Figma, Canva, Adobe Photoshop

Professional Experience

Code Creative Agency | Karachi, Pakistan

Web Developer & Website QA Tester (June 2026 – Present)
Learner (December 2025 – June 2026)

- Develop, maintain, and optimize modular web applications utilizing PHP, Laravel, and JavaScript.
- Conduct end-to-end Quality Assurance (QA) testing on web platforms to identify, document, and resolve critical bugs prior to production deployment.
- Execute complex API integrations, including configuring MYOB invoicing systems.
- Build and customize CMS structures and Shopify collection page templates for client projects (e.g., The Petal).
- Participate in daily scrum meetings and collaborate seamlessly with cross-functional teams to ensure timely project delivery.
